## Port Botany Expansion Community Consultative Committee

Date: 6<sup>th</sup> May, 2009 Meeting number: 22

## Attendees:

John Burgess (JB) - Community Representative Nancy Hillier (NH) - Community Representative Neil Melvin (NM)- Community Representative Paul Pickering (PP)- Community Representative Mick Costelloe (MCo) - Community Representative Bronwyn Englaro (BE)- Randwick City Council

Roberta Ryan (RR) - Chairperson

Sandra Spate – Minutetaker

Shane Hobday (SH) – Sydney Ports Corporation
Peter O'Leary (PO) – Sydney Ports Corporation
Marika Calfas (MC) – Sydney Ports Corporation
Kathy Lloyd (KL) – Sydney Ports Corporation
Peter Zangari (PZ) – Sydney Ports Corporation
Margaret Harvie – Baulderstone Hornibrook
Linda Armstrong(LA) – Baulderstone Hornibrook

Vince Newtown (VN) – Baulderstone Hornibrook
Quentin Pitts (QP) – Baulderstone Hornibrook

**Apologies:** Paul Shepherd

Not present: Neil Brener

| Item | Issue   | Action | By whom | When |
|------|---|--------|---------|------|
| 1    | Site Tour – 3.00pm-4.00pm  An induction, evacuation procedure and emergency procedure was conducted by Martin Carmody.  Mick Costelloe was introduced and welcomed as a new member of the                                 |        |         |      |
| 1.1  | CCC.  Foreshore Rd/Beach works  Foreshore Rd/beach works tour included the Penrhyn Estuary, dune removal, new roosting islands, the old government pier, the shared cycle/pedestrian pathway, site of the                 |        |         |      |
|      | new pedestrian bridge, the new Terminal Access Bridge (ie for trucks), the new boat ramp amenities building, the Millstream groyne and carpark.  PP asked how high the new Terminal Access Bridge would be. VN replied it |        |         |      |

| wouldn't be significantly higher the level of Foreshore Rd. PP asked whether drilling was tak place before piling at the access to site. VN responded that due to compacted hard sand drilling was undertaken.  QP drew attention to the silt curtal around the protected seagrass are noting monitors here were continued monitoring turbidity.  PP asked what the life of the solal panels for lights on the shared panels for lights on the shared panels for lights on the shared panels indicated that it was expected would be serviceable for a long panels.  Indicated that it was SPC's responsibility to maintain them.  Reclamation and Main Construction included the concrete batching planed the storage of the concrete batching planed | cing bridge being  in ea, ually  r thway they eriod.  on area ant asses t units lee ts for all and elements of the with leed the |

| 2.1 NH noted that in actions arising from the previous minutes, the section safety issues to be dealt should refer to the graph of the previous minutes, the section safety issues to be dealt should refer to the graph of the previous standard previous transfer to the previous minutes, the section safety issues to be dealt should refer to the previous transfer to the previous minutes, the section safety issues to be dealt should refer to the previous transfer transfer transfer to the previous transfer  | noting ead een soort   |
| 3 Update on construction and act   | tivities   |
| 3.1 <u>Presentation by BH-JDN (VN)</u>   |  |

|     | T   |  | 7 |
|-----|---|--|---|
|     | Landscaping at the Millstream groyne is     |  |   |
|     | being finished as well as the walkway       |  |   |
|     | and handrails.                              |  |   |
|     | At the boat ramp the shared path is         |  |   |
|     | completed, landscaping and beach            |  |   |
|     | replenishment is ongoing. The               |  |   |
|     | associated amenities building and           |  |   |
|     | revetment are also under construction.      |  |   |
|     | Rebuttment construction is to               |  |   |
|     |   |  |   |
|     | commence at the Penryhn estuary.            |  |   |
|     | Work is commencing on the                   |  |   |
|     | interterminal access corridor revetment.    |  |   |
|     | Rocks have been stockpiled for the east     |  |   |
|     | berm revetment construction.                |  |   |
|     | Cast concrete elements for the              |  |   |
|     | counterfort units are being cast at the     |  |   |
|     | pre cast yard.                              |  |   |
|     | Brotherson Dock transition units will be    |  |   |
|     | completed this month. Foundations           |  |   |
|     | works in the dredged trench for the wall    |  |   |
|     | units is commencing.                        |  |   |
|     | A major milestone will be the delivery of   |  |   |
|     | a shear leg barge which will be used to     |  |   |
|     | lift the counterfort and transition units   |  |   |
|     | into place.                                 |  |   |
|     | A trailing suction hopper dredge will       |  |   |
|     | arrive late early June                      |  |   |
|     | A Licence application for the dredge is     |  |   |
|     |   |  |   |
|     | being progressed.                           |  |   |
|     | The dredge will be used: 1) to remove       |  |   |
|     | the sand surcharge from the trench,         |  |   |
|     | which will be placed in the reclamation;    |  |   |
|     | 2) to add additional sand to the            |  |   |
|     | reclamation area, excavated from high       |  |   |
|     | spots in the swing basin. This will will be |  |   |
|     | excavated and placed in the                 |  |   |
|     | reclamation area to provide a consistent    |  |   |
|     | 15.5 metres depth in the swing basin.       |  |   |
|     | Questions and discussion                    |  |   |
|     |   |  |   |
| 3.2 | JB asked whether the stockpile of sand      |  |   |
|     | in the Penrhyn Estuary area would be        |  |   |
|     | moved to the reclamation area.              |  |   |
|     | MC replied that this would be               |  |   |
|     | redistributed in the estuary area.          |  |   |
| 3.3 | MCo asked about the size of vessels         |  |   |
| 0.0 | catered for by the expanded port.           |  |   |
|     | · · · · · · · · · · · · · · · · · · ·       |  |   |
|     | SH replied that they would be 8,000         |  |   |
|     | TEU vessels. Current vessels are up to      |  |   |
|     | 4,500 TEU.                                  |  |   |

| 3.4 | PP asked what would be done to   |  |  |
|-----|--|--|--|
|     | improve aesthetics around the storm-   |  |  |
|     | water pipes on Foreshore Beach.  |  |  |
|     | MC noted that the pipe diverted through  |  |  |
|     | the Mill Stream groyne wouldn't be   |  |  |
|     | visible. Of the other two, one would   |  |  |
|     | remain the same as is now, and SPC   |  |  |
|     | was looking at possibilities for the other.                                    |  |  |
|     | JB suggested a possibility of diverting  |  |  |
|     | the others to the groyne. However, this  |  |  |
|     | would require Sydney Water approval  |  |  |
|     | and was difficult at this stage and would                                      |  |  |
|     | need to be financed. He suggested this   |  |  |
|     | was an opportune time to look at this  |  |  |
|     | option.  |  |  |
|     | PP asked whether there was a   |  |  |
|     | possibility of drains for stormwater from                                      |  |  |
|     | Foreshore Rd went into pipes that  |  |  |
|     | discharge on the beach.  |  |  |
|     | VN replied that it did not and there was                                       |  |  |
|     | no proposal for stormwater drains from Foreshore Rd as it is designed for this |  |  |
|     | water to drain from the shoulder into the                                      |  |  |
|     | sand.  |  |  |
| 3.5 | MCo asked who would be responsible   |  |  |
| 3.3 | for maintaining the Millstream lookout   |  |  |
|     | after completion. He noted the best  |  |  |
|     | world ports have facilities for the public                                     |  |  |
|     | to be able to look at the ports and for  |  |  |
|     | public education.  |  |  |
|     | SH responded that SPC will have  |  |  |
|     | responsibility for maintenance and   |  |  |
|     | security, noting however, that this would                                      |  |  |
|     | be a public area.  |  |  |
|     | MC responded that SPC is committed   |  |  |
|     | to keeping the area in good condition.   |  |  |
|     | Foreshore Beach will have  |  |  |
|     | interpretative signage. The Penrhyn  |  |  |
|     | Estuary lookout will be the only public  |  |  |
|     | area will be closed overnight.   |  |  |
| 4   | Environmental monitoring Monthly   |  |  |
|     | Report   |  |  |
| 4.1 | Presentation by BH-JDN (QP)  |  |  |
|     | Dredging has been well managed with  |  |  |
|     | regard to turbidity. Large scale dredging                                      |  |  |
|     | has now ceased.  There have been no issues with acid                           |  |  |
|     |  |  |  |
|     | sulphate soils. Bird hazard numbers have reduced.                              |  |  |
|     | There was one dust excedence this  |  |  |
|     |  |  |  |
|     | month but it did not appear to be related                                      |  |  |

| 1   |   | T |     |  |
|-----|---|---|-----|--|
|     | to construction.  |   |     |  |
|     | All measures have been within agreed                        |   |     |  |
|     | criteria.   |   |     |  |
|     | A few vibration complaints were                             |   |     |  |
|     | received in April.  |   |     |  |
|     | The saltmarsh is still doing well.                          |   |     |  |
|     | There has been no physical damage to                        |   |     |  |
|     | seagrass.   |   |     |  |
|     | There has been a decline in sediment                        |   |     |  |
|     | deposition. This is extremely hard to                       |   |     |  |
|     | measure as there was no                                     |   |     |  |
|     | preconstruction data available.                             |   |     |  |
|     | Shorebirds numbers have decreased                           |   |     |  |
|     | significantly and have largely migrated                     |   |     |  |
|     | off site  |   |     |  |
|     | The silt curtain has been effective in                      |   |     |  |
|     | maintaining water quality.                                  |   |     |  |
|     | Questions and discussion                                    |   |     |  |
|     |   |   |     |  |
| 4.2 | PP asked whether the seagrasses                             |   |     |  |
|     | which had been failing for some time                        |   |     |  |
|     | are now thriving.   |   |     |  |
|     | MC replied that seagrass levels were                        |   |     |  |
|     | consistent with preconstruction levels.                     |   |     |  |
| 5   | Update on communication activities                          |   |     |  |
|     | including complaints  |   |     |  |
| 5.1 | Presentation by BH-JDN (LA)                                 |   |     |  |
|     | LA reported that members should have                        |   |     |  |
|     | received over the last month a                              |   |     |  |
|     | Community Notification regarding                            |   |     |  |
|     | dredging and reclamation; a notification                    |   |     |  |
|     | regarding service works at Tupia St; the                    |   |     |  |
|     | March environmental monitoring report;                      |   |     |  |
|     | and the latest activities 'look ahead'.                     |   |     |  |
|     | The Complaints Report will be                               |   |     |  |
|     | distributed after the meeting. The                          |   |     |  |
|     | Statistics Report was handed out at the                     |   |     |  |
|     | meeting.  |   |     |  |
|     |   |   |     |  |
|     | The number of requests for 'further                         |   |     |  |
|     | information' identified in the Statistics                   |   |     |  |
|     | Report was due largely to requests from                     |   |     |  |
|     | resident for their pre-condition property                   |   |     |  |
|     | reports.  |   |     |  |
|     | There have been four vibration                              |   |     |  |
|     | complaints since the last meeting,                          |   |     |  |
|     | largely due to dynamic compaction                           |   |     |  |
|     | activities at the east berm.                                |   |     |  |
| I   |   | İ | i e |  |
|     |   |   |     |  |
|     | There was one complaint regarding Foreshore Rd night works. |   |     |  |

|     | Some nightworks are coming up, one         |                  |            |  |
|-----|--|------------------|------------|--|
|     | both in May and June. Notifications will   |                  |            |  |
|     | go out.                                    |                  |            |  |
|     | One complaint was received from a shift    |                  |            |  |
|     | worker regarding piling noise in the park  |                  |            |  |
|     | during daytime construction hours.         |                  |            |  |
|     |  |                  |            |  |
|     | Several issues around the boatramp         |                  |            |  |
|     | have either been resolved or ongoing       |                  |            |  |
|     | solutions being considered. These          |                  |            |  |
|     | issues were around lighting, the beach     |                  |            |  |
|     | pull up area and siltation around the      |                  |            |  |
|     | ramp. A new channel has been put in to     |                  |            |  |
|     | resolve the siltation issue. Ongoing       |                  |            |  |
|     | monitoring is taking place.                |                  |            |  |
|     | Questions and discussion                   |                  |            |  |
| 5.2 | NH asked whether the information from      | Council to       | Randwick   |  |
| 0.2 | the project, including minutes goes into   | respond to       | and Botany |  |
|     | local libraries, as not everyone has       |                  | Councils   |  |
|     |  | the question     | Councils   |  |
|     | access to the website. She noted that      | of placing       |            |  |
|     | material particularly the initial material | information      |            |  |
|     | on the Penrhyn Estuary should be in        | from the         |            |  |
|     | libraries. She asked where the minutes     | project in       |            |  |
|     | are distributed.                           | local libraries. |            |  |
|     | LA responded to her knowledge the          |                  |            |  |
|     | newsletters go to the libraries as bulk    |                  |            |  |
|     | numbers are sent to Botany and             |                  |            |  |
|     | Randwick Councils.                         |                  |            |  |
|     | PP reported that as well as being          |                  |            |  |
|     | RR reported that as well as being          |                  |            |  |
|     | placed on the website minutes go to the    |                  |            |  |
|     | Department of Planning.                    |                  |            |  |
|     | BE noted that information is with          |                  |            |  |
|     | customer services at Council.              |                  |            |  |
|     | LA reported that environmental             |                  |            |  |
|     | information and information regarding      |                  |            |  |
|     | the Penryhn Estuary will soon be placed    |                  |            |  |
|     | at the information board at the boat       |                  |            |  |
|     | ramp. A new sign is also currently being   |                  |            |  |
|     | designed for the existing lookout in the   |                  |            |  |
|     |  |                  |            |  |
| F 2 | park.                                      |                  |            |  |
| 5.3 | PP asked what issues were raised           |                  |            |  |
|     | regarding pedestrian/cyclists.             |                  |            |  |
|     | LA replied that there had been a           |                  |            |  |
|     | request for an artist's impression of the  |                  |            |  |
|     | pedestrian bridge to be made available     |                  |            |  |
|     | to the public and a person from out of     |                  |            |  |
|     | the area had been checking on              |                  |            |  |
|     | pedestrian access to the beach.            |                  |            |  |
| 5.4 | NH asked whether community groups          |                  |            |  |
|     | could go on inspection tours of the        |                  |            |  |
|     | Toolia go on mapoonon tours of the         |                  |            |  |
